PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience designing scalable enterprise applications using Java, Spring Boot, Microservices, REST APIs, Angular, and SQL databases. Experienced in developing secure backend services, distributed systems, and full-stack enterprise solutions in Agile environments. Skilled in API design, database optimization, CI/CD practices, Linux environments, and mentoring development teams. Familiar with AI-assisted software development tools to improve productivity and code quality.

TECHNICAL SKILLS

Programming Languages: Java, SQL, JavaScript, TypeScript

Frameworks: Spring Framework, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, Microservices, RESTful Web Services, Angular

Database Technologies: MySQL, MongoDB

Messaging: RabbitMQ

Web Technologies: HTML5, CSS3, JSON

Build & Dependency Management: Maven

Version Control & Development Tools: Git, GitHub, Postman

Testing Frameworks: JUnit 5, Mockito

CI/CD & DevOps: Jenkins, Docker

Operating Systems: Linux, UNIX

Architecture & Design: Object-Oriented Programming (OOP), Object-Oriented Design (OOD), MVC Architecture, Distributed Systems, API Design, Secure Application Development

Methodologies: Agile (Scrum), SDLC

AI-Assisted Development: ChatGPT

PROFESSIONAL EXPERIENCE

Senior Project Engineer

Centre for Development of Advanced Computing - Chennai

02/2025 - Present

- Designed and developed scalable enterprise web applications using Java, Spring Boot, Spring MVC, and Spring Data JPA, focusing on performance, security, and maintainability.
- Developed RESTful microservices and backend APIs, integrating frontend applications with backend services and enabling seamless communication between enterprise systems.
- Developed responsive user interfaces using Angular, TypeScript, HTML5, and CSS3, integrating them with RESTful backend services.
- Designed relational database schemas using MySQL, optimized SQL queries, and implemented efficient data access using Spring Data JPA and Hibernate.
- Worked in Linux/UNIX environments for application deployment and troubleshooting.
- Collaborated with cross-functional teams to analyse requirements, resolve technical issues, and deliver stable releases.
- Participated in code reviews, unit testing using JUnit and Mockito, debugging, and CI/CD deployment activities following Agile and SDLC best practices.
- Utilized Git, Maven, Jenkins, and Docker to support build automation, version control, continuous integration, and deployment activities.
- Used ChatGPT to assist with code refactoring, debugging, documentation, and improving development productivity.
- Contributed to CMMI-aligned project management processes, supporting project planning, technical documentation, process compliance, and continuous improvement initiatives.

- Trained and mentored junior developers by providing technical guidance, conducting code reviews, and promoting software development best practices.

Application Developer

IBM India Pvt Ltd - Pune

03/2019 – 09/2022

- Developed and maintained enterprise backend services using Java, Spring Boot, Spring MVC, and Microservices architecture for scalable distributed applications.
- Designed and implemented RESTful Web Services with secure API communication between distributed systems following REST principles.
- Developed data access layers using Spring Data JPA and Hibernate, optimized MySQL queries, and managed MongoDB collections to improve application performance.
- Developed Angular-based frontend modules using TypeScript, HTML5, and CSS3, integrating them with Spring Boot REST APIs.
- Contributed to CI/CD pipelines using Maven, Jenkins, Git, and Docker, supporting automated builds and deployments.
- Implemented asynchronous communication between microservices using RabbitMQ to improve scalability and decouple backend services.
- Collaborated with development, QA, and support teams in Agile environments to deliver high-quality releases.
- Participated in debugging and production support activities for critical applications.

Engineer

Qburst Technologies Pvt Ltd - Thrissur

06/2018 – 03/2019

- Developed backend modules using Java 8, Spring Boot, Spring MVC, and RESTful Web Services, focusing on scalable and secure transaction processing.
- Developed RESTful APIs and integrated Angular 6 frontend components with backend services using JSON-based communication.
- Designed and implemented a Daily Scrum Management application using Java,

Spring Boot, Angular, and MongoDB following MVC architecture.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

University of Calicut

Graduation Date: 04/2018

CERTIFICATIONS

- **Full Stack Developer** - IBM
